

Routine Care for your Waypoint Cabinets

Waypoint[®]

LIVING SPACES

- Dust frequently. Use a soft cloth such as flannel or an old tee shirt (no buttons or snaps). Never use any cloth or cleaning pad with an abrasive surface. Avoid paper towels too. They can be abrasive.
- Spills and spots need to be removed immediately with a lightly dampened soft cloth. Use a small amount of mild detergent diluted in water if necessary. Follow by wiping with a dry cloth. Detergents with citrus or ammonia are not recommended.
- Cabinet surfaces with traditional wood finishes can be polished once every few months with a non-oil based furniture polish. AVOID: any polish containing silicone as well as paste waxes. Paste wax builds up on the surface which will just attract more dirt. Cabinets with painted or Thermo-Foil finishes should not be polished.
- Glass inserts can be cleaned with regular window cleaner and a soft cloth.
- Should something unusual happen, touch up materials will be needed. Fill-sticks are for deep scratches. Use a soft cloth to remove excess. Markers are Waypoint Touch Up Kit included with every kitchen sink base appropriate for lighter scratches. A Touch Up Kit is packed in the sink base of every Waypoint kitchen order for just this purpose. If hinges need adjustment, contact the Waypoint Partner Team (1/877-957-7278) for instructions on how to adjust the particular type of hinges on the cabinets.

Waypoint's Resilient Finishing System has a multi-step process that will look beautiful for years with just a little care and regular maintenance. Oh, and happy spring house cleaning!

Waypoint suggests removing dust from cabinet frequently with a soft lint-free cloth. The cloth may be slightly dampened with water or a spray type dust remover. Cabinet surfaces may be polished once every few months with a high quality, non-oil based furniture polish. Do not use a paste wax type material, as wax build-up is difficult to remove and will leave a residue that attracts dust and moisture. Polishes containing silicon should not be used.

Clean spill immediately. Use a clean cloth and mild soap if necessary. Wipe dry with a clean soft cloth. Do not use detergents, citrus or ammonia based cleaners, steel wool, soap pads or abrasive cleaners.
