

BISHOP CABINETS

KEEP YOUR CABINETS CLEAN AND DRY

Your cabinets have a catalyzed varnish top coat applied over a water resistant sealer. This provides a tough finish designed for kitchens and bathrooms. However, **IT IS NOT WATERPROOF**. If allowed to remain on the surface, water, grease, and harsh household liquids will break the finish, thus voiding your warranty.

THE FOLLOWING STEPS SHOULD BE TAKEN TO PROTECT YOUR FINISH.

Dry off liquids immediately with clean dry towel.

Clean only with a damp cloth--**DO NOT WASH WITH SOAP AND WATER!**

Touch up scratches with touch up kit.

Occasionally apply Lemon Oil, Cabinet Magic or Pledge to renew luster.
