

Easy-clean Convenience

Your home is your sanctuary, keep it clean and healthy. Harsh and heavy-duty cleaners are unnecessary with Cambria. For cleanup with ease, all you need is soap, warm water, and a soft cloth. If you wish to take the extra step of disinfecting your surfaces, please see the following list of Cambria-approved disinfectants that meet Centers for Disease Control and Prevention (CDC) guidelines.

- 70 percent isopropyl rubbing alcohol
- Homemade spray mixture of 4 teaspoons of bleach and 1 quart of water. Let this solution sit on the surface for 30 seconds, then wipe with a dry cloth. Next, rinse the surface with clean water and dry with a soft cloth.
- Lysol® Disinfectant Spray
- Professional Lysol® Disinfectant Spray
-

Never use full strength bleach or abrasive powders or scrubs like Comet®, Soft Scrub®, or S.O.S.® pads. Such products will cause the surface to appear dull or inconsistent. See our list of APPROVED CLEANERS.

Cambria is maintenance free and requires no sealing or polishing. In addition, never apply any sealers, penetrants, or topical treatments to Cambria.

Too Hot to Handle

All natural stone surfaces, including Cambria, can be damaged by sudden and excessive heat, especially near the edges, as well as direct and/or sustained heating on the top. Always be sure to put closed-weave hot pads or solid trivets under hot pots, pans, griddles, electric frying pans, slow cookers, and roaster ovens before placing them on Cambria.

Leave the Chemicals In the Closet

Corrosive chemicals can damage any surface, including Cambria. Do not expose Cambria to strong alkalines, acids, free radicals, oxidizers, or other similar chemicals or cleaners (whether high, neutral, or low pH).

See More approved cleaners and cleaning instructions on the following pages.

APPROVED CLEANERS

Maintaining your Cambria® is easy. Simply wash with a soft cotton cloth and warm water, use a mild soap if desired. If you have dried spills and desire to use a cleaner you can use one of the following products:

Please avoid selecting a variation of the product listed above, as most brands have multiple variations of product types; some variations may include chemicals or additives that could damage your Cambria.

Additional information

Frequent attention may be required from finger prints or other spills; Simple Green D Pro 3 and/or denatured/ isopropyl (rubbing) alcohol work very well in this situation.

DO NOT use abrasive or strong alkaline or acid (high or low pH) cleaners. DO NOT use or expose Cambria to bleach, oven cleaners, Comet,[®] Soft Scrub,[®] S.O.S.,[®] products with pumice, batteries, paint removers, furniture strippers, tarnish or silver cleaners. DO NOT use abrasive or harsh scrub pads. DO NOT apply any sealers, penetrants, or topical treatments to Cambria under any circumstances. Such products will wear off and cause the gloss to appear dull or inconsistent.

We appreciate you being a Cambria customer and look forward to helping you in the future. If you have any additional questions, please visit CambriaUSA.com, or call 1-866-CAMBRIA (1-866-226-2742) toll-free to speak to one of our Cambria Customer Care Representatives.

Maintaining Cambria® Product is easy. Simply wash with a soft cotton cloth and warm water; use a mild soap if desired.

Do not expose, in use or otherwise, Cambria Product to abrasive, strong alkaline, acid, free radicals, oxidizers or cleaners of the like (whether high, neutral, or low pH). Various chemicals are corrosive and/or erosive in their ability to attack any surface, including Cambria Product. Be very aware of these potential damages to its surface.

Cambria is not heat proof, chemical proof, or fracture proof in any form. Be aware of damaging exposure to these potentially damaging acts.

Do not use or expose Cambria Product to certain cleaning products, including, but not limited to, bleach, oven cleaners, Comet®, Soft Scrub®, S.O.S.® products with pumice, batteries, paint removers, furniture strippers, tarnish or silver cleaners, or the like. Do not use abrasive or harsh scrub pads.

Do not apply any sealers, penetrants or topical treatments to Cambria Product under any circumstances. Such products will wear off and cause the gloss to appear dull or inconsistent. Contact Cambria for further information by calling 1-866-CAMBRIA or visiting our website at CambriaUSA.com.

1. Cambria Product is created from pure natural quartz stone. Variation in natural quartz stone color, pattern, size, shape, and shade are unique and inherent characteristics of this Product.
2. Color blotches are intentionally included in many designs to enhance the Product's natural beauty. Samples are small select cuts from a larger slab and may not fully exhibit all the design characteristics of the final installed Product. These variations do not affect performance and do not qualify for Product replacement.
3. Cambria is durable and resistant to surface damage. However, all stone can be damaged by force and no stone is chip proof. Objects hitting edges, particularly at sinks or dishwashers, may cause chips. Though a minor knife slip will dull the knife and not harm Cambria Product, no stone surface is scratch proof. Surface markings are more visible on monotone designs than multi-colored design surfaces.
4. Cambria Product is not a seamless product; seams are visible. Where there are seams changes in the Product pattern and shade will be visible.
5. Natural stone surfaces can be damaged by sudden and/or rapid change of temperature, especially near the edges, as well as direct and/or sustained heating of the top. Cambria Product may not withstand the direct transfer of heat from pots and pans and other cooking units such as electric frying pans and griddles, slow cookers, roaster ovens, and heat lamps. Therefore, the use of a closed-weave hot pad or solid trivet, like a bread board, is always recommended to prevent heating the Product.
6. Cambria Product is not a structural support material and must be supported in every application. 2cm and 3cm thicknesses are for countertops and other horizontal surfaces; 1cm thickness is for vertical surface finishes such as walls, tub and shower surrounds.

7. Cambria Matte™ finish will show surface markings caused during normal use, which are easily removed with an all-purpose cleaner such as concentrated Simple Green® cleaner. Cambria Matte™ finish does not shine, and may soil and/or appear to stain from soiling, especially when used in heavy traffic areas such as flooring.

8. Installation of Cambria Product requires walls and cabinets to be properly prepared for installation, which includes, but is not limited to, structurally sound, straight, level and square walls and cabinets. Lack of proper preparation may cause poor installation and poor seam fit or inconsistent countertop overhang and placement.

Thank you for your purchase of Cambria.
